

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/298,910
ATTORNEY DOCKET NO. Q54131

D1

a base station in radio communication with said means for producing dialing signals, said base station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not, wherein

 said means for producing dialing signals includes a telephone set having a dial pad with keys, a dialing signal being generated when a key of said dial pad is pushed.

Sub 2

12. (Twice Amended) A radio access system comprising:

 means for producing dialing signals;

 means for transmitting the dialing signals each time they are produced; and

 a base station control station in radio communication with said means for producing dialing signals, said base station control station including means for deciding whether a dialing signal represents a final digit of a dialed telephone number or not, wherein

 said means for producing dialing signals includes a telephone set having a dial pad with keys, a dialing signal being generated when a key of said dial pad is pushed.

Sub 3

14. (Twice Amended) A radio access system comprising:

 means for producing dialing signals;

 means for transmitting the dialing signals each time they are produced;

 a base station in radio communication with said means for producing dialing signals; and

 a base station control station in radio communication with said means for producing dialing signals through said base station, said base station control station including means for

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/298,910
ATTORNEY DOCKET NO. Q54131

deciding whether a dialing signal represents a final digit of a dialed telephone number or not,
wherein

DB
said means for producing dialing signals includes a telephone set having a dial pad with
keys, a dialing signal being generated when a key of said dial pad is pushed.

Please add new claims 16 and 17 as follows:

Sub *fix*
16. (New) A radio access method comprising the steps of:

producing dialing signals when a key of a dial pad is pushed;
transmitting dialing signals each time they are produced; and
deciding at a base station whether a dialing signal represents a final digit of a dialed
telephone number or not.

DH
17. (New) A radio access method comprising the steps of:

producing dialing signals when a key of a dial pad is pushed;
transmitting dialing signals each time they are produced; and
deciding at a base station control station whether a dialing signal represents a final digit
of a dialed telephone number or not.
